Foggy morning off & later foggy again. To Harb. Sq. this A.M. on errand. Called at Ferns on return & left Ab. Key. Saw Sparrow Hawk at Smith R. Peter & worked on Cisen this P.M. Read a little in Stevenson's letters which I began yesterday. Nuttall Club this evening. Remond read a list of new Eng. Trees & Shrubs that furnished food for birds. Oliver Lottus was at the Club.

- 56° 7:17 official - 78° at home.

Ther TUES. APRIL 16, 1912 Wea

Clear, cloudy in P.M. thunder and  
light rain. Sultry & hot.

I have felt very poorly to-day  
and have kept in, studying, except  
for a walk to the mail box.  
Read the terrible of the sinking of  
the Titanic off the Banks. Too terri-  
ble! Lucy's friends, the Speddens were on  
board - Their names are among the latest  
Over a thousand, apparently went down!  
Worked on Arcton & lay down - May come  
down this evening. Prof. Cole came in this  
evening & lay down. The Richards is very fond  
of it. Ther WEDNESDAY 17 Wea

Clear with light clouds in A.M.  
mild - P.M. chilly. Rain in late  
P.M. and evening -

Much better to-day. Called on Miss  
Purdie this A.M. She had given  
Henry's pressed plants, flowers and moss, also  
max Henry's built Bull names Vol VIII.  
lost! C.F.B. can supply that. I have  
extra nos. & a complete Rhodora to  
dispose of. Back to Hens. Sq. & walked home.  
Auto ride this P.M. with Mr. & Mrs. Ketch  
& Ellen. Called on Mary. Even at home -

Ther THURS. APRIL 18, 1912 Wea

Rainy day, heavy rain in P.M.  
It evening - mild.

I spent much of today working  
on my letters - It is a long  
but interesting task.

This evening my husband & I are to see  
Shubert & I believe to see Maxine  
Hardt's wonderful play, *Siemurra*.

It was a wonderful performance  
in Arabian Night Oriental scene.  
Gloria Hanchbach & Francis Constantin  
Beautiful scene were marvelous. Home by 11.

Ther FRIDAY 19 Wea

Clear, most of day, clearing in  
P.M. Skilful & up to weather cloudy.  
Went to 712 Churchill's this A.M. got  
there at 11 A.M. and worked over his  
1910 plants with him till after 9 P.M.  
We had a real good time together.  
His plants were mainly from Meade &  
Maryland - I said to him & tea.  
Left by 10 & got home by 11 P.M.

Read much about the terrible wreck  
of the Titanic - too awful for words.

This morning, I read & wrote a long  
letter to Miss Paton. This afternoon  
I wrote a long letter to May Dexter  
and later called on Mrs. A. M. F. Davis.  
He gave me today an etching of Valley Quail  
by W. Williams. He told me today W. Williams  
was an artist in San Francisco and was the first  
director of The Art School there. He collected  
a little money from friends. The Mrs. Davis and  
brought material to teach etching. Later when he  
stopped working, he gave his patrons speci-  
mens of the work he did with his pupils.  
The Valley Quail was one. Williams died some  
20 yrs. ago. His pupils have done good work  
in oil. Mrs. Davis gave me a photo of Anna  
Quail. Mr. & I took tea with Ruth, Geo. & Mary.

I saw a male fly into  
the dead pine with some-  
thing in his bill. He alighted  
but a few feet from the hole, and  
arranged the morsel with his claw.  
In a few seconds he flew and  
alighted against the hole, thrust  
in his head and withdrew it with  
empty bill. Then he flew off.  
In a few seconds I saw him  
drop to the lawn below the tree  
and pick up something, a beetle  
apparently. He flew to a limb  
near the hole and repeated the  
previous performance, and then  
flew into the hole and feed the  
young as before - Then he flew  
off and I left. I did not see the young

- Sparrow Hawk -  
Mrs Clarence Smith's place  
Brattle St. Cambridge

This morning I went on to  
the lawn near the old pine  
and talked with the man. He  
has constantly seen 2 Sparrow  
Hawks about. He finds remains of  
many sparrows under the tree.

Twice as I examined the hole  
with my glass I saw a  
young bird put his head  
up at the hole and look out  
for  $\frac{1}{4}$  -  $\frac{1}{2}$  min. or more.

Hence I saw the ♀ Hawk  
soon & light in the Catalpa  
near the pine, with no food in bill.  
She finally flew to a more distant  
tree - I previously saw her fly onto  
the lawn - I was about  $\frac{1}{2}$  hr. there

This morn. I visited the  
Sparrow Hawks from various  
points on the lawn, under &  
near the tree. I saw and  
diagnosed with absolute certainty  
2 old birds and 3 young. I  
saw both old birds on the wing  
approaching or leaving the pine  
or neighboring tree. The  
young were out of the hole.  
Two were on the horizontal  
branch just above the hole -  
one kept running to & fro  
on the branch. They were dull  
of color with short tails.  
The third young was nearly  
on a neighbor's branch -

The young man who works at this place and who has kept in touch with the Hawks last year & this year, told me today, July 13, that about 3 weeks ago, or about June 22, he saw together five young birds. He was absolutely sure of it.

Between August 5-8  
The dead pine was cut down & removed.  
It was considered dangerous — The hole was broken by the falling tree.
